

INDICOTE®

LEAK INDICATION PAINT

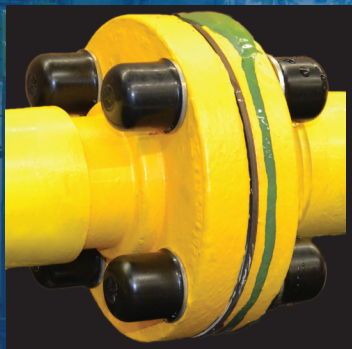

OPERATING TEMPERATURE:
35 °F - 220 °F

APS Indicote® leak indication paint is a golden yellow latex-based paint that instantaneously changes color through contact with liquids or vapors for immediate visual indication of leaks that are often too small to trigger an indication with conventional detection devices.

BENEFITS:

- pH indication (for acid and/or base)
- Lead-free
- Fast drying
- Easily recoated
- Efficient accessory to the Clear PTFE spray shield.

Changes to blue when exposed to bases higher than pH 8.

Changes to red when exposed to acids lower than pH 4.

After leak detection and repair, the paint requires a simple touch-up.

**Two coats of paint recommended with coating thickness 1.4 - 2.2 mils when dry. Dry time 4 hours between coats.

INDICOTE® IS OFFERED IN: (Storage Temperature: Between 50 °F - 80 °F)

Gallon: 3.78 L (1 Gal)
Covers up to 350 – 450 sq.
ft. per gallon
Gallon Shelf Life: 8-10 years

Quart: 32 fl oz. (946 mL)
Covers up to 88 – 113 sq. ft.
per quart

Aerosol Can: 5.5 OZ (156 g)
Covers up to 4 sq. ft. per can

APPLICATIONS:

- Flanges
- Valves
- Pipes
- Pumps
- Tanks
- Flow Indicators
- Expansion Joints
- Weld Sites
- Clamps
- Hose Connections
- Threaded Connections
- Areas Surrounding Pressure Relief Valves
- Pipe Vents
- Fume Hood Exhaust

DETECT CHEMICALS SUCH AS:

Base

- Sodium Hydroxide
- Potassium Hydroxide
- Calcium Hydroxide
- Lithium Hydroxide
- Concentrated Ammonia
- Tetramethylammonium Hydroxide
- Rubidium Hydroxide
- Cesium Hydroxide
- Trisodium Phosphate
- Strontium Hydroxide
- Barium Hydroxide
- Guanidine
- Other base solutions and vapors with pH 10 and above.

Acid

- Hydrofluoric Acid
- Sulfuric Acid
- Hydrochloric Acid
- Chlorine
- Trifluoroacetic Acid
- Glacial Acetic Acid
- Phosphoric Acid
- Nitric Acid
- Hydrobromic Acid
- Perchloric Acid
- Oxalic Acid
- Other acid solutions and vapors with pH 3 and above.
